

BLIND SIDE™

Stacked. Fast. Deadly.™

Lead-Free Hunting Shotshells

Stacked.

Our engineers call it 'packing density'. Tightly packed and stacked Hex™ Shot gives you 15% more shot pellets per shell, increasing your kill zone by 25%. And it's 100% Hex Shot.

Fast.

Hex Shot means more payload in a smaller space. The innovative, choke responsive Diamond Cut Wad delivers tight, consistent patterns at higher velocities. The re-engineered Drylok Super Steel® system, with "hinged wad" keeps your powder dry and increases velocity.

Deadly.

You're dealing out 250% more bird-blistering trauma with Blind Side ammunition. The Hex Shot hits waterfowl like high-velocity tumbling bricks, delivering massive wound channels that maximize energy deposit and knockdown shock within the bird.
